# On the Horizon

## Sloan

These are a few of the states I'm in
The first one Jersey, the second one thin
The nicest thing of mine is yours
So, take a letter down
And send it to the highest bidderOn my team and my horizon
And you'll shine in that scene capitalizing
Now just the thing for me is baby let me be
Because someone's gotta sign on the dividing lineI'll be setting up my sights woo
To watch me programming all the glamour rights
The thing for you to do was leave
I'll see you when it's snowing
And give me back the master keyTo my place on the horizon
And we'll shine all of time capitalizing
And you'll beat out all the odds of staying thinWouldn't you like to keep moving
Your life would be slightly improving
When you better come on by
And take a letter down
And send it out as sympathyFor my team on the horizon
And we'll shine all in that scene capitalizing
So just sign it, underline it
And represent the scapegoats
And we will blame it on you
'Cause someone had to state it
So, I could imitate it masterfully
