

I Belong To You

Toni Braxton

I wouldn't change a single thing about you, baby
You shower my world with your love
You got a way about cha baby
That lets me know that there's no other man
You take care of home
I was lost until I found you
Refuse to live without you
As long as you are good to me I belong to you
You belong to me
I belong to you
The love we share comes naturally
I used to think, I knew love before I met you
You love my defenses down, baby
I let you in to my heart
And you unlocked true love in me
You take care of home
I was lost until I found you
Refuse to live without you
As long as you are good to me I belong to you
You belong to me
I belong to you
The love we share comes naturally
I belong to you
You belong to me
I belong to you
The love we share comes naturally
So hard to find true love, baby
Don't wanna live without you
I know this love is forever
'Cause it shows in every little thing you do
Always make a way to see love through
I belong to you
The love we share comes naturally
I belong to you
You belong to me
I belong to you
The love we share comes naturally
