Million Dollar View

Trace Adkins

I don't need to be sitting on the roof of a high rise looking at the city below
I don't need to be sitting on the beach watching that sun sink in the Gulf of Mexico
If i climb to the top of a Colorado mountain I could see forever from there, but i dont have to go anywhere
Chorus
I've got a million dollar view
right here in my living room
in this little tin roof house
even with the shades pulled down and the lights turned out
I don't need to go to some exotic place

to see the kind of thing that takes my breath away no all i gotta do is look at you
and I've got a million dollar view
When i see you laying there in that sexy night gown it burns me down deep in my soul
You're a living work of art a site that would inspire the likes of Michaelangelo,
If i took a telescope and pointed it to heaven i wouldn't find nothing up there
that compares to what ive got right here
Chorus
I don't need to go to some exotic place to see the kind of thing that takes my breath away no all i gotta do is look at you you know the truth is i don't know if a million would get it you're my million dollar view yeah just looking at you your'e my million dollar view
