

# Montego

## Roommate

I know I get what I give, since I don't feel too good  
Guess I don't give much, maybe I just wanna live  
I knock on wood every time, I feel human touch  
What can I do to fit in? Kiss up to someone  
It will never happen, when alienation hits in on me  
My empathy is gone, my conscious blackens  
And I just spit in your face, when you ask for help  
My heart is made of stone  
Nobody's best friend, I'm on my defense  
Everyone stands alone, another elbow hit  
Somebody's ego trip, everyone stands alone  
Everyone stands alone  
I know I get what I give, funny vibes, what goes around  
Comes around but yeah, I just wanna live  
With someone by my side, some kind of close bond  
Another spit in your face, every time you need me  
I am busy with my own  
Nobody's best friend, I'm on my defense  
Everyone stands alone, another elbow hit  
Somebody's ego trip, everyone stands alone  
Everyone stands alone, when it all comes down to it  
We all stand alone  
S-s-stand alone, nobody's best friend  
I'm on my defense, everyone stands alone  
Another elbow hit, somebody's ego trip  
Everyone stands alone  
So many times it's been shown  
Everyone stands alone, hearts that are made of stone  
Everyone stands alone, when it all comes down to it  
We all stand alone
