Challenge the Storm

Immolation

Miles to suffer
So much before us
Confusion follows
Fills the airThe struggle ahead
Will change us all
Shock our conscious
Test our strengthsWalk through the fire
Force our steps
Weaken our hearts
With chilling screams of deathDead is creeping at our backs
We dread to think what lies aheadHysteria exploding all around us
Flames that touch the sky
Numbing fear takes over
Prepare yourself
For the worst is yet to comeCascading down like rain
Our blood, our hopes, our beingLearn to breathe
The aggression in
It thrives in you
Must forge on
We believe
This must be done
Embracing madness
We must forge on
