

Atmos (feat. Wafia)

Thrupence

You've been staring down this road forever
Hoping there's a way you'll try
But right now I need you more than ever
You won't see it in the way I cry You've been staring down this road forever
Hoping there's a way you'll try
But right now I need you more than ever
You won't see it in the way I cry
The way I cry
The way I cry
The way I cry
The way I cry
The way I cry
The way I cry
The way I cry
The way I cry
The way I cry
The way I cry
The way I cry
You've been staring down this road forever
Hoping there's a way you'll try
But right now I need you more than ever
You won't see it in the way I cry
The proof is in the way you stayed
With the baggage that I left your way
With the baggage that I left your way You've been staring down this road forever
Hoping there's a way you'll try
But right now I need you more than ever
You won't see it in the way I cry
The proof is in the way you stayed
With the baggage that I left your way
With the baggage that I left your way
With the baggage that I left your way
With the baggage that I left your way
With the baggage that I left your way
With the baggage that I left your way
With the baggage that I left your way
With the baggage that I left your way
With the baggage that I left your way
With the baggage that I left your way
With the baggage that I left your way You've been staring down this road forever
Hoping there's a way you'll try

But right now I need you more than ever
You won't see it in the way I cry
