

# Hit My Heart

## Boy

These machines are always running  
Like the rivers and the clocks  
And these wheels don't get tired of turning  
On and on and up and up  
And everybody's going somewhere  
Something's always going on  
Barely blink, we might miss out  
On so much laughter, so much fun  
We want our names on all the lists  
Don't really mind if they're misspelled  
And if nobody takes a picture  
We take pictures of ourselves Look at us  
Look how we shine  
Look how we celebrate our time  
The greenest grass  
Right at our feet  
Look how we skip from peak to peak So we're drifting downstream  
Exposed but unseen  
All covered in exclamation marks  
Give me something tender  
Something I remember  
A touch or a beat, a wave of heat  
That hits the heart It's hard to bear the sound of silence  
So we get bored quite easily  
Have you heard this song? I found it  
Like it, like it, like me please  
And we'll fast-forward to the chorus  
Join the choir, spread the words  
I'll take my finger off the trigger  
Just take yours off the trigger first Look at us  
Look how we shine  
Look how it eats up all our time So we're drifting downstream  
Exposed but unseen  
All covered in exclamation marks  
Give me something tender  
Something I remember  
A touch, a beat, a wave of heat  
That hits the heart  
A touch, a beat, a wave of heat

That hits the heart  
That hits the heart  
Come hit my heart On and on and on So we're drifting downstream  
Exposed but unseen  
All covered in exclamation marks  
Give me something tender  
Something I remember  
Something I remember  
A touch, a beat, a wave of heat  
That hits the heart  
A thought that sticks and flips the switch  
And shakes me up  
A little thing that I let in  
A word that sparks  
And hits my heart  
Come hit my heart
