

On The Streets Saving The Scene From The Forces Of

Good Clean Fun

This is the new revolution we're building a brand new society
It's about time we find a solution and not let it slip away
It's time that we all work together
This little thing we call unity has the power to make it all better
And that is why today We'll all be on the streets
Saving the scene from the forces of evil
Side by side, living our dreams
All the positive people We'll fight our way through the frustration
Overcome negativity
To us it is not a temptation
Because that is not the way
All that is needed to start this is a healthy dose of positivity
We've found our way through all the darkness
And on this brand new day We'll all be on the streets
Saving the scene from the forces of evil
Side by side, living our dreams
All the positive people
