Immaculate

Shearwater

This I long feared
Of what might be
Fear though I'd scare
An ebony
If all the world
Could see us now
They'd realize
That we could be immaculate
If all the world could see us now
I walked through day
What should I might fear
Word can't describe
This love I need
But now I testify
Before you now
No wasting time
No waiting then
If all the world
Could see us now

They'd realize
That we could be immaculate
If all the world could see us now
I don't wanna lose control when it comes to rains
I don't wanna be the one to never cease the day
I want you to come with me [Incomprehensible] break away
From the unnatural
If all the world
Could see us now
They'd realize
That we could be immaculate
If all the world could see us now
If all the world could see us now
If all the world could see us now
We were living for the world
Living in a dream
If all the world could see us now
