

# Faithful

LeCrae

There I go again  
Throwing caution to the wind  
'Cause, I can't pretend  
It's not true and we are only friends  
And it only complicates things, how I feel  
I guess it just depends  
Wish I could talk to you now  
When will I see you again  
I sit at home and think about you all night long  
You've been gone for much too long  
I want to be with you, I don't want anybody else  
So if you want me too then you can have me for yourself  
And I would walk a million miles  
Just to see you smile  
I'd tempt the hand of fate for a chance

To look into your eyes  
I have all but lost my faith  
That true love could be  
When I hold your hand  
You make me believe  
I sit at home and think about you all night long  
You've been gone for much too long  
I want to be with you, I don't want anybody else  
So if you want me too then you can have me for yourself  
I want to be with you, I don't want anybody else  
So if you want me too then you can have me for yourself  
I want to be with you, I don't want anybody else  
So if you want me too then you can have me for yourself
