

House of Suffering

Bad Brains

In this house of suffering
I gotta let some joy in
I hear that freedom will win Oh, where, oh, where can Jah love be now?
My dear, it's here in the underground
Inside the hearts of your own children In this house of suffering
I spiritual logic grinnin'
One way grace is my friend
To conquer doom and sin And all the nations lying
While all our people crying
And they stop at nothing
Nothing, nothing In this house of suffering
Don't want but just one thing
Got to have my origin
In this house of suffering
