Bottom Feeder

Project 86

So little of what seems to be Is ever really there So much of what's here I resent I am a demagogue Born of eternal flaw Forever just a memory my friendSo when I disappear She will still be here Sifting my remains through the ashesShe's not ordinary She's not ordinary She's not ordinary She's just like meBut there is something wrong Inside of me that says She and I are one in the same So I'm not alone She's just like meShe's not ordinary (She's just like me) She's not ordinary (She's just like me)She's not ordinary (She's just like me) She's just like meShe's not ordinary (She's just like me) She's not ordinary (She's just like me)She's not ordinary (She's just like me) She's just like me She's just like meShe's just like me
