

Living In the Sky With Diamonds

Cobra Starship

Her heart is racing
And the room is heating up
And her eyes are glazing
But she still can't get enough The beat is pumping, now she's blowing up
The last thing on her mind is growing up
She'll kiss the sky before she's giving up
And oh, oh, here she comes She's dancing with the stars
Living in the sky with diamonds
She's dancing with the stars
And oh, how the lights are shining She holds the key in her hand
Reflection in the mirror's her best friend
Oh she's dancing with the stars, the stars
Keep dancing You can't change her
'Cause you know you think it's hot
And that girl loves danger
But she don't know when to stop The beat is pumping, now she's blowing up
The last thing on her mind is growing up
She'll kiss the sky before she's giving up
And oh, oh, here she comes She's dancing with the stars
Living in the sky with diamonds
She's dancing with the stars
And oh, how the lights are shining She holds the key in her hand
Reflection in the mirror's her best friend
Oh, she's dancing with the stars, the stars
Keep dancing Gonna get you somehow
You're the talk of the town
Losing control now
And I won't come back down
And I hope you come down She's dancing with the stars
Living in the sky with diamonds
She's dancing with the stars
And oh, how the lights are shining She holds the key in her hand
Reflection in the mirror's her only friend
Oh, she's dancing with the stars, the stars She's dancing with the stars
Living in the sky with diamonds
She's dancing with the stars
And oh, how the lights are shining She holds the key in her hand
Reflection in the mirror's her best friend
Oh, she's dancing with the stars, the stars

Keep dancing
