

# Avalanche

## Wintersleep

I like long drives  
the radio is on all night  
cause you say so  
lying beside  
your beautiful bones  
candlelight  
and heaving tones  
this avalanche of love and skin  
collides conquers and collapses  
I breathe your breath  
I smell you skin  
I taste your saddened sentimentthis avalanche of love and skin  
collides conquers and collapses  
I'll breathe your breath  
I smell you sin  
I taste your saddened sentimentthere'll be nothing left after this
