

Back to the Beginning

Kalispell

We were alive
We had sparks in our eyes
We were young
I was yours, you were mine
Touch like a fire
Every kiss was inspired
And now the memories run through our minds
All I can think of is holding you again
The way that I used to
We are too far from the end
Let's take it back to the beginning
When all we had was true love
Let's take it back to reminiscing
When all we knew was love love love love love
When all we knew was love love love love love
When all we knew was love
(Knew was, when all we knew was, when all we knew was love)
Seasons go by
All our days turned to nights
We can get back the time that we loved
I'll keep the faith if you promise to stay
And I'll find the way to your heart
All I can think of is holding you again
The way that I used to
We're too far from the end
Let's take it back to the beginning
When all we had was true love
Let's take it back to reminiscing
When all we knew was love love love love love
When all we knew was love love love love love
When all we knew was love
(All we knew was, when all we knew was, when all we knew was love)
