

In the Cube

Fishbone

Well let me pull myself up and out
Of this toilet that I'm in
It's liberating for a little while
But living in shit with shit
And bein' all about shit ain't my style
So up to the front I go
Past the ass rim where the sun and the snow
Melt into a river of sprinkly clear waterChant :

Deep in the toilet

Doo deep doo

I'm in the cube, in the cube

Deep in the toilet

Deep doo doo

I'm in the cube, in the cubeNumb to the cold that I'm swimmin' in

I imagine a world without sin

Where there's mutual respect for every soul

With no question

And no testin' of no one's wits or individuality(chant)Chorus :

I'm in the cube and I'm deep in the toilet

Way down deep where no good scent can spoil it

Where I can get respect from all the shit around me

As far a what comes down from above meI'm in the cube and I'm deep in the toilet

Way down deep where no good scent can spoil it

It eventually turns into a degree of a flea

Down here I see the future of life to beIt's too crowded up here

Everybody's greedy and they just won't calm down

Their intentions are good

But they always get drowned by the ego overthrown

And the know-it-all hard-heads

That insist on running the show

The devil, the dookey that threatens my friends and me(chant x2)Some get so caught up within the whirlpool of

bad

That while trying to reach the good they still end up bein' sad

From trying to rush into helping god's plan(chant & chorus)Back down I go to the toilet bowl roll

Where no one is and are afraid to go.

I can find peace and tranquility

Amongst the peanuts and shit

The smell is only a bluffJust to make me leave

From in the cube

This fuckin' cube
In the cube where the the toilet
Where no good scent can spoil it
Let's be real with ourselves (x2)
From the dirt we came
And from the dirt we shall return
This is a lesson in life
We should all learn(chorus)'causez no matter how much you stack it up high
It always goes down to the dirt where the shit fertilizes
Some don't realize we come from this dirt shit
The mineral pit
God made the devil
But the devil makes us weak sometimes
So are we fighting against a part of god
Or is a part of god's creation lying ?
Let some woman or man
Deem himself special
'causez when your label is gone your road is long
Back to the minerals and vitamins where you belong(chant)
