

# I Never Loved A Man Before

## Diana Ross

Deep in the night  
When you think the world is fast asleep  
You come to me, take me where I wanna go  
Making promises I know you'll keep  
You're the first love in my life  
And the moment we touch  
I can tell you how weak I've grown  
You make me feel like, I never loved a man before  
Never held him in my arms, never told him I loved him  
I remember all the lovers coming through my door  
But you make me feel like I never loved a man before  
It's hard to say it  
Words don't come so easily to me  
But it's here in my heart  
And it's making me lose control  
What else can I tell you  
Who'd refuse a night that takes you away  
And touches your very soul  
You make me feel like, I never loved a man before  
Never held him in my arms, never told him I loved him  
I remember all the lovers coming through my door  
But you make me feel like I never loved a man before  
I went along looking at love differently  
Ohh, but now it's so strong  
Look what you've done to me  
You make me feel like, I never loved a man before  
Never held him in my arms, never told him I loved him  
I remember all the lovers coming through my door  
But you make me feel like I never loved a man before  
You make me feel like, I never loved a man before  
Never held him in my arms, never told him I loved him  
I remember all the lovers coming through my door  
You make me feel like I never loved a man before
