Take Me

Fool's Garden

Riding on a boat of time into the future
Waiting for the day to go under
Inside the great big ocean, we look for the origin
We're riding, riding and we wonder
Science and progress can't open the chain
Any day we've got to get out again
We're looking for the reason
The big wheel's spinning around, our ancestries found
Take me down to where the water flows
And take me up to where the big wind blows
And make me melt inside of you
Take me out, come on and take me into
Take me down to where the water flows
And take me up to where the big wind blows
And make me melt inside of you
Take me out, come on and take me into
We're passengers of time succeeding our fathers
We're standing in a queue and we rack
Our brains over riddles, problems and solutions
At any day we reach the track
But science and progress can't open the chain
At any day we've got to get out again
All we know is that we really don't know nothing at all

Face to the wall
Take me down to where the water flows
And take me up to where the big wind blows
And make me melt inside of you
Take me out, come on and take me into
Take me down to where the water flows
And take me up to where the big wind blows
And make me melt inside of you
Take me out, come on and take me into
Science and progress can't open the chain
At any day we've got to get out again
All we know is that we really don't know nothing at all
Face to the wall
Take me down to where the water flows
And take me up to where the big wind blows

And make me melt inside of you
Take me out, come on and take me into
Take me down to where the water flows
And take me up to where the big wind blows
And make me melt inside of you
Take me
