

I Feel Possessed

Crowded House

She said I could never do that
But I know you can, you are in my dream
We are one person not two of a kind
What was mine is now in your possession
I could feel you underneath my skin
As the wind rushed in sent the kitchen table crashing
She said nobody move
Or I'll bring the house down
I hardly know
Which way is up or which way down
People are strange God only knows
I feel possessed when you come around
It was one of those times
Wished I had a camera on me
Six foot, now off the ground
I know how that sounds
Look above you and beyond me too
That kind of view don't need an explanation
I'm not lying, not asking for anything
I just want to be there when it happens again
I hardly know
Which way is up or which way down
People are strange God only knows
I feel possessed when you come around
Whenever you invade my home
Everything I know flies out the window
It's above you and beyond me too, I don't want an explanation
But I'll be there when you bring the house down
I hardly know
Which way is up or which way down
People are strange God only knows
I feel possessed when you come around
People are strange
And I feel possessed when you come around
I feel possessed
I feel possessed
I feel possessed
