

Do You Like This

Rome

Ooooooooooooooh

Yes you are

Tell me the truth baby

Tell me the truth now baby

Have you found another lover

Someone who cares

And holds you tight

I won't cry

I won't shed a tear

Cause when your well runs dry

You gonna miss my loving baby

The way I hold and touch and kiss

The way I do you like this and do you like that

Do you like this, do you like that

The way I do you like this and do you like that

Do you like this, do you like that

The way I do you like this and do you like that

Do you like this, do you like that

The way I do you like this and do you like that

Do you like this, do you like that

Now one day

You'll see it'll be reality

And all pain will come

You search for me

High and low

But all remains

Is a memory

Of how I used to hold and touch and squeeze you baby iiiiiii

The way I do you like this and do you like that

Do you like this, do you like that

The way I do you like this and do you like that

Do you like this, do you like that

The way I do you like this and do you like that

Do you like this, do you like that

The way I do you like this and do you like that

Do you like this, do you like that

The way I do you like this and do you like that

Do you like this, do you like that

The way I do you like this and do you like that

Do you like this, do you like that

The way I do you like this and do you like that

Do you like this, do you like that

The way I do you like this and do you like that

Do you like this, do you like that

The way I do you like this and do you like that

Do you like this, do you like that

The way I do you like this and do you like that

Do you like this, do you like that

The way I do you like this and do you like that

Do you like this, do you like that

The way I do you like this and do you like that

Do you like this, do you like that
