

Iced Over

Catamenia

Thru the thick bright ice
I see the thundering sky
Cold I feel on my skin
Move I can't, ice covering me Thoughts crawl into my head
Wish I was soon to be dead
This pain what I feel
Is something that I can't deal Please someone end this misery All my life, like endless night
All my pain, go away
In my mind, I see I die
Only dream is what I see Can't see the light of day
Feels like I'm passing away
Time became meaningless
Fighting for a life is useless Please someone end this sorrow Waiting that sweet death
To end this sick nightmare
Come here to me to get
Now I'm leaving from here Please someone end my life
