

Last Call

Hedley

Headlights blinking like a car stuck on the side of the road
Another story 'bout a setting sun that's never been told
Feels like you're losing it all, feels like you're losing it all
Every time you turn around it seems the world has got you down
Keep holding on, we're holding on together

[Chorus:]

This is the last call

For anyone who gives a damn at all

Last call

If we stand together, we will never fall

With the lights off, we'll shine on, we'll shine on

Last call

For anyone who gives a damn at all

When will it rain upon the desert of your tired heart

Like a tempest, like a storm rolls in to tear you apart

Like you're losing it all, feels like you're losing it all

Every time you turn around it seems the world has got you down
Keep holding on, we're holding on together

[Chorus]

We all bleed

You and me

You can't stop living now you gotta believe

You can't stop living now you gotta breathe

[Chorus]

Last call

Last call

With the lights off

We'll shine on, we'll shine on

Last call

For anyone who gives a damn at all

For anyone who gives a damn at all
