Dehydration

Pressure 4-5

Faith is failing
Thoughts come undone
Every single cell inside my body goesNumb, just like it never did before
Just like it never didMy faith failing
Whered it come from?
And every single cell inside my body is numbShout to anyone in the dark
Feel these words that create a spark
Cause theres aFire that burns us
And we cant live without water, water, water
Face the flood cause its going under
And only those without wings will diePeople speak and sing and stand up
But words arent enough to fill my cup
'Cause theres aFire that burns us
And we cant live without water, water, water, yea
Face the flood cause its going under
And only those without wings will die
Looking up, how Id love to join them
But I never learned to flyI never learned to fly
(Thats not the reason)
That I have never tried
(What you believe in)
I guess it seemed so tired
(What you believe in)Face your own flood
Together we willDrown, just like we never did before
Just like we never didFace the flood cause its going under
And only those without wings will die
Looking up, how Id love to join them
But I never learned to fly
