

Dehydration

Pressure 4-5

Faith is failing
Thoughts come undone
Every single cell inside my body goes Numb, just like it never did before
Just like it never did My faith failing
Where'd it come from?
And every single cell inside my body is numb Shout to anyone in the dark
Feel these words that create a spark
Cause theres a Fire that burns us
And we cant live without water, water, water
Face the flood cause its going under
And only those without wings will die People speak and sing and stand up
But words arent enough to fill my cup
'Cause theres a Fire that burns us
And we cant live without water, water, water, yea
Face the flood cause its going under
And only those without wings will die
Looking up, how Id love to join them
But I never learned to fly I never learned to fly
(Thats not the reason)
That I have never tried
(What you believe in)
I guess it seemed so tired
(What you believe in) Face your own flood
Together we will Drown, just like we never did before
Just like we never did Face the flood cause its going under
And only those without wings will die
Looking up, how Id love to join them
But I never learned to fly
