Dehydration

Pressure 4-5

Faith is failing

Thoughts come undone

Every single cell inside my body goesNumb, just like it never did before

Just like it never didMy faith failing

Whered it come from?

And every single cell inside my body is numbShout to anyone in the dark

Feel these words that create a spark

Cause theres aFire that burns us

And we cant live without water, water, water

Face the flood cause its going under

And only those without wings will diePeople speak and sing and stand up

But words arent enough to fill my cup

'Cause theres aFire that burns us

And we cant live without water, water, water, yea

Face the flood cause its going under

And only those without wings will die

Looking up, how Id love to join them

But I never learned to flyI never learned to fly

(Thats not the reason)

That I have never tried

(What you believe in)

I guess it seemed so tired

(What you believe in)Face your own flood

Together we willDrown, just like we never did before

Just like we never didFace the flood cause its going under

And only those without wings will die

Looking up, how Id love to join them

But I never learned to fly
