

Like It

Itchy Poopzkid

Empty boxes make the most sound
This is how its always been
I never really liked their playground, no
I never really liked their scene at allDismantle every word weve told
And our heart and soul we sold
Youre hating us for what we love
Keep talking while we hit the roadAnd we like it - like it
We wont turn awayPut us down and down and down
We all know what it feels like
Put us down to kiss the ground
and it helps to reach our stridewe wont let you count us out
that is what youre aiming for
put us down and down and down
we wont let it go
and well come back for sureCause we like it - like it
We wont turn awayCome on deal the cards again now
small chance at victory
youre waiting for our laydown
misery loves companyso form your crowd around you
speak up and make believe
a good hand is what youve got
But we got aces up our sleeves
