

Light You Up

Pilot Speed

We often asked my honest friend

If we'd hold on tight till the end

Your knowing smile just breaks me down

And leaves fighting words in my mouth

I will light you up, I will light you upFor you and I, [Incomprehensible]

For you and I, lived on broken faith

For you and I, today is not the ending

Today is not the ending you would likeWithout these lights to lead us home

We're just drifting blind out here alone

What we forgive, what we forget

I'll be a martyr in your background

Whispering words of faithfulness

I will light you up, I will light you up

For you and I, [Incomprehensible]

For you and I, lived on broken faith

For you and I, stood tall until the ending

Today is not the ending you would likeNow the silence chokes, talk to me my friend

Am I not a victim? Tell me why should we pretend?

When the silence breaks, faces in the room

People gaping wide eyed at the space from me to you

People gaping wide eyed at the space from me to youFor you and I, love was a fire escape

For you and I, lived on broken faith

For you and I, today is not the ending

Today is not the ending you would like

(You would like)

I will light you up

(You would like)

I will light you up

(You would like)

I will light you up, I will light you up

I will light you up, I will light you up
