

# Virtue and Wine

[Sondre Lerche](#)

Summer killed the ones you loved  
I hesitate and tell you  
When people leave without goodbye  
I lose another brickThe buildings are tall  
The world explains all  
And here I stand and face myself  
I lead the way for usI've frozen down my memory  
It's morning when she gets up  
She puts on Lionel Ritchie  
I've already had enoughThe queues are long  
Guess I am wrong  
This chemical environment  
Is getting out of handVirtue and wine  
Cannot help you swim  
Pain and sorrow  
Must come if you goIt's the chemistry  
And the things we should'nt do  
I am nothing without you  
Ba-ba-da-ba-ba-ba-ba
