

# It's Not Me Talking

## A Flock of Seagulls

I hear voices but there's no one there  
You speak to me in another language  
Computer says it's a binary code  
It's such a pity, I can't understand it  
It's not me talking  
I see a ship from a golden sky  
I sent a message, will they understand it?  
Computer's ready but to overload  
This isn't happening the way I planned it  
It's not me talking  
It's not me talking  
It's not me talking  
Sending messages  
It's not me talking  
It's not me talking  
I made a contact with another world  
Another being from another planet  
Another time and another place  
Another galaxy, another planet  
It's not me talking  
You got me talking, talking  
Talking, talking  
You got me talking, talking  
Talking, talking  
You got me talking  
You got me talking, talking  
Talking, talking
