

Ergonomics

Kajagoogoo

I buy things that are made to measure

I like to throw 'em around, hit it

Opener cullender throw this handle

They come together and they make a big sound

They come together and they make a big sound Variety is the proposition

Modern is out of date, hit it

Neatest fitting comfy handles

They come together and they make a big sound

They come together and they make a big sound CHORUS All across the land

Its made for the hand

All across the land

Its made for the hand Mould and patterns add to interest

Hand made on a hand made face, hit it

Made and curved by ergonomics

They come together and they make a big sound

They come together and they make a big sound Repeat CHORUS Ergonomics are efficient

Make you think in symmetry

Use the manual it's tradition

Made to aid you instantly
