

Science of Love

Donna Summer

Chemistry, look what you've done to me
Chemistry brought me near gravity
Chemistry, look what you call me up
My heart is pounding
I can't bear to breathe
Just got over you, what do you want?
You're like a broken record
Spinnin' in my head
Why can't you let me be? I don't understand
What it is about you
The more you reject me
The more I want from you
(Chemistry) You're always on my mind
Always have been, always will be
I think about you all the time
I don't want to, you're a habit
(Chemistry) And I'm running and running
And running and running away from you
Every time when you come
I come undone, can't escape from you, it's the science of love
It's the science of love
(Chemistry)
It's the science of love
It's the science of love, I'm thinking to fight it
To get away from you
Something always pulled me
Right back to you, I don't understand
What it is about you
The more you reject me
The more I want from you
(Chemistry) You're always on my mind
Always have been, always will be
I think about you all the time
I don't want to, you're a habit
(Chemistry) And I'm running and running
And running and running away from you
Every time when you come
I come undone, can't escape from you, it's the science of love
It's the science of love, I wanna be with you but I'm so afraid

My hearts not ready 'cause I'm still in pain
Im feeling my love is out of control
I wanna give up but I cant let go Youre always on my mind
Always have been, always will be
I think about you all the time
I dont want to, youre a habit
(Chemistry) And Im running and running
And running and running away from you
Every time when you come
I come undone, cant escape from you It's the science of love
It's the science of love
(Chemistry)
It's the science of love
It's the science of love
(Chemistry)
Love is science
