Still

Katie Armiger

I am lyin', I am tryin' I want so much to believe I am flyin', and that high and fast is where I'm supposed to beBut if I'm honest If I'm forced to tell it straight I'm afraid of heights and edges And I need to find a placeWhere I can take the time To go deep into the moment I got nothin' left to proveMake my mind slow down In the middle of all that motion Let myself be moved and be still am learnin', I am thinkin' I am ready to be touched I am breathin', I am feelin' Learnin' how to trust myselfAnd then after spinnin' in the wind I am rooted to the earth And I'm reachin' up againSo I can take the time To go deep into the moment I got nothin' left to proveMake my mind slow down In the middle of all that motion Let myself be moved and be still am listenin', I am listenin' Something tells me what I'll findIf I can take the time To go deep into the moment I got nothin' left to proveMake my mind slow down In the middle of all that motion Let myself be movedSo I can take the time To go deep into the moment I got nothin' left to proveMake my mind slow down In the middle of all that motion Let myself be moved and be still And be still, and be still
