

Focus

[Ryan Keen](#)

It's hard to see when the smoke cloud's over your eyes
And you loose focus as you losing on your time
And there's one last thing to do, it's waiting there on you
Cut from this circle leave, it behindCome on over for a moment, and see what you find
Worry and distance, it's all in your mind
Come on over, take a chance now
I know what you like
Caught in the middle, between your heart and your mind
And it's hard to see when the smoke clouds cover your eyes
And you loose focus as you losing on your time
And there's one last thing to do, it's waiting there on you
Cut from this circle leave, it behindCome on over for a moment, see what you find
Worry and distance, it's all in your mind
Come on over, take a chance know
I know what you like
You're caught in the middle, between your heart and your mindAnd it's hard to see when the smoke cloud's
over your eyes
And you loose focus as you losing on your time
And there's one last thing to do, it's waiting there on you
Cut from this circle leave, it behind, whoa
It's now, I was waiting on somebody else to show
Me how,
A singe spark will catch a light
And when you thought, could change your life
So take the leap and trust you'll reach the other, side
