

Song Number 7

Randy Houser

Song number one, yeah, that's the one
That was bumpin' outta the speakers
Everybody knew the words
Everybody sang along
Everybody can see her
And the sweet melody of song number three
Had her slidin' on over to me But song number seven (seven, seven)
Took me all the way to heaven that night
Song number seven (seven, seven)
Cranked up to eleven set the mood just right
I was holding her tight
She had her hands in the air
She was fallin' in love and I was already there
Song number seven, oh There were stars in the sky sparks in her eyes
And the smell of hickory burnin'
Everybody there just disappeared like it was only me and her and
The midnight blue behind a red dirt moon
Had me caught up in the groove of Song number seven (seven, seven)
Took me all the way to heaven that night
Song number seven (seven, seven)
Cranked up to eleven set the mood just right
I was holding her tight
She had her hands in the air
She was fallin' in love and I was already there
Song number seven, oh Everytimne we wanna go back
We just hit that track
Song number seven
Yeah it was Song number seven (seven, seven)
Took me all the way to heaven that night
Song number seven (seven, seven)
Cranked up to eleven set the mood just right
I was holding her tight
She had her hands in the air
She was fallin' in love and I was already there
Song number seven, oh Song number seven
Yeah it was song number seven, oh
