Big Barbeque

Sam Black Church

Reduced to cave dwelling mutants
a commie computer made a big barbecue
he turned the world into a contaminated sewer
they wouldn't talk, so we had to die

living off refuse of civilizations past
watching green sunsets over acid seas
running from dogs in starving packs
rotting to death but thank god I'm free

the government decides for me
my life would have to cease
they had to stop the disease
destroy the world so they wouldn't be commies
the government decides for me

living off refuse of civilizations past
watching green sunsets over acid seas
running from dogs in starving packs
rotting to death but thank god I'm free

smoldering wreckage radioactive death
genetic mutations in those who survive
money is worthless water is precious
the insects will take over in a few years
