

16 Monkeys

Los Lonely Boys

Sixteen monkeys on a chuck wagon rolling down the road
There's sixteen monkeys on a chuck wagon rolling down the road (uh huh)
They're going round town telling everybody "Let's get stoned." (oh yeah)
I said they're going round town telling everybody "Let's get stoned."
Break it down y'all I'm gonna take a trip to outer space because I want to, I need to
I'm seeing lots of colors, the sun's a ball of butter and I feel good, so good
My spaceship's flying I'm an astro boy I watched the cow jump over the moon
He said, "Play me a song," but the notes were wrong and out of tune
I guess my cocoa puffs fell off of my spoon
Sixteen monkeys on a chuck wagon rolling down the road
I said there's sixteen monkeys on a chuck wagon rolling down the road
They're going round town telling everybody "Let's get stoned."
I said they're going round town telling everybody "Let's get stoned."
Break it down again
Me and little brother were sipping chocolate bubbles
Wearing underwear over our pants
A blanket cape we're like Batman
And Robin saving the day
Trying to get the bat mobile back to the cave
I really should of listened to what mamma had said
Instead I fell down and broke my arm
