

Ghost

Motorpsycho

Please understand, it doesn't matter
'cus right now you don't exist
You have no place, you have no purpose
And you're never ever missed I hope that you're (flattered),
You've picked the scab of the sore
So utterly worthless, it's a
hollow point that you've scored It's a high stakes game you're running
But i'm not playing anymore
It's just endless repetition
And i've heard it all before I see you've found a good companion
I think you've got what you deserve.
I understand and i no longer worry
You have a brand new master to serve
Let's stop feeling guilty,
i'm too tired and i'm closing the door
I hope that you're happy
cus I'm not even sure
I really know you anymore
