

# Hold Me

## Happy Rhodes

The moonlight and the heat  
Has got us on the street  
My heart is thumping like the beat  
As you walk up to me  
The light reflecting on my skin  
Has got you wondering  
How it would feel to hold me

Open up your heart  
I see the colour red  
My cheeks are blushing too  
From thoughts inside my head  
Open up your eyes  
I see the colour blue  
I'm sure that I could fall in love with you

Hold me, move my body like you want to just  
Control me, I don't mind with you were dancing slowly  
Hold me like it's just us in this space

Oh face to face  
Now your looking at me in this human space  
In a different setting to our usual case  
Hold me like it's just us in this space

So you make over your way  
Like predator to prey  
I search for clever words to say  
But nothing comes my way  
I start to panic still I stand  
As your reach for my hand  
And I whisper come ons too
