Mushroom Dance

The Ben Taylor Band

Written by: Ben TaylorI understand that mushrooms come from outer space
They always leave a smile upon my face
They have come from very far away
To show us what the heavens have for us todayMushroom dance
Even my fears cannot resist this chance
Mushroom dance
Open your ears because there's nothing more hypnotic than tranceEverybody needs to loose their place sometimes
Like, no man alive can stay in time until he dies
All I mean to say is If you loose your mind,
No one else is very far behindMushroom dance
Even my fears can not resist this chance
Mushroom dance
Open your ears because there's nothing more hypnotic than a tranceRemembering the story like you do, the way you do
You must have been waiting on the golden afternoon, to bring you news
