

# Have to Go Through It

[Tamia](#)

There ain't no joy without pain  
And there ain't no sunshine without rain  
And there are no couples who are problem free  
No, and there ain't nobody who can make me happy I have to go through it with somebody  
And baby, that somebody is you  
I have to go through it with somebody  
And I want that someone to be you What would we do? Where would we go?  
What would you tell me that I do not know  
I now that you're mine, I know that you're fine  
So you are not perfect, I really don't mind No we're gonna argue and we're gonna fuss  
That's gonna happen that is called love  
And we're gonna break up, we're gonna make up  
Let's stay together your love will take us I have to go through it with somebody  
And baby, that somebody is you  
I have to go through it with somebody  
And I want that someone to be you All the time spent tryin' to find who's right or wrong  
Tryna tell you yours when I have some of my own  
Let's agree to disagree on certain things  
'Cause we could break up and move on  
But it would be the same old thing with somebody else I have to go through it with somebody  
And baby, that somebody is you  
I have to go through it with somebody  
And I want that someone to be you I have to go through it with somebody  
And baby, that somebody is you  
I have to go through it with somebody  
And I want that someone to be you
