What Happens Now

COLD

Does the bite still sting?
Did it make you feel the world?
Did the venom enter your heart?
Like a love on the way?Was the killer inside your head?
Did your memories often fade?
Is it hard to breath?
Did we make you this way?Chorus:What happens now?
Need a hero to save your day...
Need your something that's gone away...
Oh, what happens now?Need a hero to save the day...
Now he's on the way...Did it freak you out?
Could you feel it in your veins?
When the venom enters your heart?
Do the stars shine the same?Did you think you could save the world?
Are you far, far away?
Is there someone that's made for you?
Did we take her away?Chorus:What happens now?
Need a hero to save the day...
Need your something that's gone away...What happens now?
Need a hero to save the day...
Now he's on the way...
