

# Please Come For Me

## Korn

Alone and come undone  
As my tears create a sea  
Haven't been awake so long  
Aa the Devil's waiting for me Right now if you could see  
Right now attacking me  
Hold on, dance with me  
You'll never get to me Take a look around  
Help me  
I see this losing little face  
Staring at me In another way disease been torn  
The depression's ecstasy  
Haven't been awake so long  
The devil's coming for me Right now if you could see  
Right now attacking me  
Hold on, dance with me  
You'll never get to me Take a look around  
Help me  
I see this losing little face  
Staring at me  
Looking for that special sound  
That's coming for me  
It's never gonna take me down  
Please come for me, please come for me Please come for me, please come for me  
Please come for me, please come for me  
Please come for me, please come for me  
Please come for me That I can't fake Take a look around  
Help me  
I see this losing little face  
Staring at me  
Looking for that special sound  
That's coming for me  
It's never gonna take me down  
Please come for me, please come for me They are coming  
They are coming  
They are coming  
They are coming
