You Wanted More

A-ha

You know the way you've been before
I've seen the signs outside your door
You've set the rules
Their bitter taste can't be ignored
It just the same, just like before
You wanted more
I loved the sun, I loved the rain
I gave it up but all in vain
I loved the way it was before
So bittersweet to be adored
We had it all, you let it go
You wanted more
But in the end, what is a friend?
If not someone to help pretend
Remember me
You know my name, I'm still the same
But not for you, that's not enough
You wanted more
I loved the sun, I loved the rain
I gave it up, but all in vain
We couldn't change, you know the score
So bittersweet to be adored
We had it all, you gave it up
You wanted more
Just say it, you loved the way it used to be
The way it was with you and me
It came to late and left too soon
Just like the rings around the moon
We had it all, you let it go, you wanted more
We had it all
You gave it up
You wanted more
