

The Bird

28 Days

Hurry up and beat the rush
be the first to cut us down
i don't have to run anything by you
that would seem to be the cool thing to do
you don't know me so step the fuck back kid
don't assume to judge me or my crew
mad love to those choose
Talk your shit and i'll stay true
we won't forget it
to watch our backs
we're glad you care, you were
we're stoked that we met
there for us when we needed you most
we couldn't have made it through without you there
mad respect goes out to you
You're what i mean when i say crew
I remember much more good than badi so love what i do
i've friends and people that i love and
to the bad i've got something for you
no matter what you say no matter
love me back
you try to do
So hurry up and beat the rush
be the first to cut us down
that would seem to be the cool thing to do
we never liked you anyway
sip your cunty latte
and shove it up your fukin
ass when your through
To the bad i've got something for you
see i've got friends and people that
what you try to do
love and love me back
no matter what you say no matter
