Dead Roses

Sevendust

Beg and pleading Why don't you feed another lie You can climb all your fences But nothing's gonna keep you high (So far nothing's working) Nothing's working (I've seen love die) It's falling out Hate your beautiful way We live in your game Your days getting closer And all love completely erased We run from the plague That you keep right beside you So close to you Just give me the feeling Something that'll take me on a ride To all the familiar places But still a good place to hide (So long, nothings worth it) So not worth it (I scream, you try) To hold me down

Hate your beautiful way
We live in your game
Your days getting closer
(Closer! Closer!)
And all love completely erased
We run from the plague
That you keep right beside you
So close to you
Hate your beautiful way
We live in your game
Your days getting closer
(Closer! Closer!)
And all love completely erased
We run from the plague
That you keep right beside you

Hate your beautiful way
We live in your game
Your days getting closer
(Closer! Closer!)
And all love completely erased
We run from the plague
That you keep right beside you
So close to you!
