

Stay With Me

Handguns

What a way for the year to end
You finally drove me home
I made up some poor excuse
So you would take the back roads

You dropped me off at my house
And then I watched you crawl away
As I whispered softly
Tap the brakes

Call me back and say
That you need me
'Cause I should've slowed it down
Please believe me

That period after lunch
I saw you in my hallway
I didn't know what to do
Much less what to say

Now you're here in my heart
And I still don't have the words to convey
Know exact what it makes me feel this way

Call me back and say
That you need me
'Cause I should've slowed it down
Please believe me
Stay with me and I'll always stay true
Every road I take, leads me back to you

And I got a secret that I must confess
You got my heart beating straight out of my chest
You got my heart beating straight out of my

Call me back and say
That you need me
'Cause I should've slow it down
Please believe me
Stay with me and I'll always stay true

Every road I take, leads me back to you
Stay with me and I'll always stay true
