

I Need Time

Donna Summer

Five to nine
Early Sunday morning around breakfast time
I heard a sudden tapping at the kitchen door
Oh, and there was more, well, it was you I saw No mistake
I knew you'd come around that sad look on your face
Then you begged me to come in and I said yes
Oh, what a fool I am, I should have turned away I need time
To turn the time around
To let it all hang out
To fight my fear and fight my doubt I need time
To turn the time around
(Get a hold)
Of love
Spoken words don't mean enough No mistake
Remember not to break the promise that you make
I'll meet you fifty fifty in the middle now
And I won't back out there'd better be no doubt I need time
To turn the time around
Little did I know that
Love would bring you to my door I need time
To turn the time around
Little did I know that
Love was on our side I love you, you know I
You know I always will love you now
I know I do love you
You know I'll always be true to you my love Here you stand
Torn up yellow T-shirt and guitar in hand
I wanna love you now
Oh, forget the past, I wanna make love last I need time
To turn the time around
Let it all hang out
Love will bring you back again I need time
To turn the time around
Little did I know that
Love will bring you back again
