

What Have I Learned

Bizzy Bone

Yeah, some people wonder, you know, well they say: "what have you learned"? And to your left, your right,
your left, your right
It's to your left, your right, your left, your right
To your left, your right, your left, march with me! It's to your left, your right, your left, your right [x4] What
have I learned?
Surrounded by nothing but snakes and worms
What have I learned?
It don't matter when nobody take it, they is a concern
See the good in the ones that have burned
And you never got all that you've earned
Don't interrupt me, I speak to the lord
Heavenly choir, now we are in Church In the temple, we cleaning the mental; the evil it lurks
Coming up off of on the corner, with dirtier thoughts
Here's thirty seconds to start
They slither like worms, they jealous of purity
Jealous of people in love;
They caught on a women, destroy the connection, they see that you happy
And here come the scrubs, I'm tellin you bruh
They down with the serpent to get in their mind
Believe the people who witness the Christ
Look at my life, and now they blind
Nobody to find, they sellin' their souls without even knowing I catch em'
Without definitions, and give em reditions of scriptures and shit,
I keep walking knowin' is mine
I walk and I shine in the sublime, gotta ward of all the demons
Outta my thought, they caught, they gone I tell em sit back and wake em',
Literally thuggin, just come in and clog up their mind
What have I learned? What have I learned? What have I learned?
Surrounded by nothing but snakes and worms
What have I learned?
It don't matter when nobody take it, they is a concern
See the good in the ones that have burned
And you never got all that you've earned
Don't interrupt me, I speak to the lord
Heavenly choir, now we are in Church With a bounty on my head, and the county holdin' my mind
Angels grippin' my spine, dear lord, these are scandalous times
We livin' in revelations, nation against nation
Blood in the hood on the boat like Haitians
Me and little brother, we are runnin' for salvation

Everyday, comin' and facing temptation
 Casin' joints, with the base and the point, the place with a dutch
 Little joy, little souljah boy, you better keep your boys with no noise, no voice, and? no choice
 Runnin, we stop, you better watch the cops, you better get off the block
 You mean to tell me that motherfuckers is still sellin' rocks?
 And they mob with the glock, and they nod... Allah
 Who do you think you are? Dead in the heart
 Dead man walking, man don't even start
 A tear for the above, but we thuggin' in the park
 Another? on the porch with a sawed of shotgun, let it spark, on the multitude, is that all you got?
 Trying to shock the dude, and give him... in his heart
 And laugh at him fast like... and the ark
 Rubbin' the eye, you better hold that stash
 Weeded out, and baby, even now
 A poor child in the hood, no hood, no doubt, no wood, no mort, no dream, no style
 Ambulances, coroners, and some that never know no doors
 Brain cartiledge up on that floor, it's one friend, please, let me tell you one more
 What have I learned?
 Surrounded by nothing but snakes and worms
 What have I learned?
 It don't matter when nobody take it, they is a concern
 See the good in the ones that have burned
 And you never got all that you've earned
 Don't interrupt me, I speak to the lord
 Heavenly choir, now we are in Church
 Grind in the days in a maze
 Amazed with the phase in the plague of a homeboy blazed
 Now the homeboy slayed in the streets, so crazed
 Know that he prayed, that shit is played
 It's ok, it's alright
 Spirit will be better when you see that light
 When you see that flight
 And Allah provide, perfections, let's go take a ride
 Loadin' up clips, hollow tips, ready for murder, swallow this
 Follow this, model this; with death, you don't have to swallow shit
 When it's bottled up and it tastes like piss
 Ridin' on up...
 ... with the hurt and pain, but the hurt remains
 What have I learned?
 Surrounded by nothing but snakes and worms
 What have I learned?
 It don't matter when nobody take it, they is a concern
 See the good in the ones that have burned
 And you never got all that you've earned
 Don't interrupt me, I speak to the lord
 Heavenly choir, now we are in Church
