Let's Make It Last

Brandon Heath

Rain come down tonight
Except for the bump on my head I'm feeling alright
Dancing to our favorite tune, I pulled you in way to soon
Bang went the drums, we went boo, yeahRunning through the yard
Splashing through puddles with you, without regard
Do you think the neighbors will care
So what if they do, they'll just stare, kids will all say it's not fairThe way that we love, the way that we left
It's something worth seeing, so let's make it last, let's make it lastCome sun sunny day
We'll call and sit to our jobs, what will we say
She's coming down with the flu
I think that I'm catching it too, this is what love makes you doThe way that we love, the way that we left
It's something worth seeing, so let's make it lastThe way that we love, the way that we left
It's something worth seeing, yeah, so let's make it last
Live out each moment, they go by so fast, let's make it last
