

Code of Energy

Papa Roach

I was scatterbrained, when I found the time to find
That times are evil, sick and disjointed
My skin is thick, thick and calloused
I'm ready to shed the shell, ready to shed the shell So you think you have figured me out
A young man lost in his problems
Some problems aren't that easy to solve
You can't break our code of energy I'm bent out of shape, there is no happy ending
I've come to a point, where I just don't give a fuck
My skin is thick, thick and calloused
I'm ready to shed the shell, ready to shed the shell Go, you gonna change
(Ready to shed the shell)
Go, you gonna change
(Ready to shed the shell)
Go, you gonna change
(Ready to shed the shell)
Go, you gonna change So you think you have figured me out
A young man lost in his problems
Some problems aren't that easy to solve
You can't break our code of energy Code of
Code of energy
Code of energy, change
Code of energy, change Hi, I'm paranoid
Goodbye, I'm in the void
Haunted by insecurity
Bipolar asymmetry So you think you have figured me out
A young man lost in his problems
Some problems aren't that easy to solve
You can't break our code of energy So you think you have figured me out
A young man lost in his problems
Some problems aren't that easy to solve
You can't break our code of energy Hi, I'm paranoid
